The Party and Government attach great importance to irrigation. This year's capital investment in water projects will be 1.5 times more than in the previous year, amounting to 337 million rubles. This will be spent for the construction of several irrigation projects. Expansion of the Fergana canal in the Fergana valley has been completed. Kokand water reservoir construction has started. Construction of another is in progress at Kara-Derya. Construction of a water reservoir is also under way at the Chirchir and Ahengeran rivers region. The reservoir near the Zarekshan River has been completed.

### Great Ferghana Canal Being Deepened

THE reconstruction of the Great Ferghana Canal, in Uzbekistan, has been started. This 270-kilometre-long canal was built in 1939, and its waters have already irrigated hundreds of thousands of hectares of cotton plantations in the Ferghana Valley.

claimed in the canal zone and so it has been decided to deepen and broaden the canal. Over 100 excavators, bulldozers and other machines are on the job.

As a result of the reconstruction about 40,000 additional hectares of land will be irrigated this year.
